POSTAL REVENUE, *continued.*

Letters, Newspapers, Prices Current and Book-packets which are *unpaid* will be liable to a surcharge equal to double the prepaid rate; and, if they be insufficiently prepaid, to a surcharge equal to *double the deficiency*.

Private Post-cards prepaid by means of halfpenny postage stamps may be sent by the Inland Post on the following conditions:—

They must be of ordinary card-board not thicker than the material used for the Official Inland Post card. The maximum size must correspond as nearly as possible with the size of the Inland Official Card, and the minimum size must not be less than $3\frac{1}{4}$ by $2\frac{1}{4}$ inches.

The rules and regulations relating to the Official Inland Post Card, and to the Official Foreign and Private Post Cards, apply equally to Inland Private Post Cards.

A Private Post Card which does not conform to the above conditions will be treated as a letter and charged accordingly.

The Postage on a Parcel must be fully prepaid or it cannot be forwarded.

A Book Packet may not exceed 3 pounds in weight; nor 2 feet in length or 1 foot in width or depth except it be intended for transmission by Inland Parcels Post.

Newspapers, Prices Current, Book-packets and Parcels must be posted without a cover or in a cover open at the ends or sides so as to admit of the contents being easily withdrawn for examination; the mere clipping of the corners or of the sides of an envelope or other cover is insufficient. They must not contain any letter or communication of the nature of a letter, nor anything that may injure the Officers of the Post Office or the contents of the Mail Bags.

If any letter or communication of the nature of a letter be found in a Newspaper, Prices Current, Book-packet or Parcel it will be withdrawn and surcharged at the *Wholly Unpaid Letter-rate of Postage*. If inseparable the whole Packet will be liable to the Letter-rate of Postage.

The following may, however, be transmitted by Book-post:—

Old Letters, which have apparently passed through the Post before and have served their original purpose.

Copies of Letters which do not bear a present date and which it is manifest are not serving the purpose of *original* letters.

Letters which are intended for publication in a Newspaper or otherwise.

Circulars, *i. e.* which, according to internal evidence, are being sent in identical terms to several persons and the whole or greater part of which is printed, engraved or lithographed.

Such Letters and Circulars must not, however, be closed in any manner and must be so put up as to admit of easy examination of their contents.

Any Letter or other Mail Matter may be registered on pre-payment of the Registration Fee and Postage.

Packets containing Money, Jewellery or other Value, *must be registered* and must be prepaid at the *Letter-rate of Postage*.

Any Packet found to *contain Value*, but not registered will be liable to a surcharge equal to double the Registration Fee, *viz.*, fourpence.

N.B.—By Law the Post Office is not liable for the loss of any Registered Letter or of its contents; but in order to meet the requirements of the Postal Union Treaty, the Postmaster for Jamaica will be prepared to make good the contents of a REGISTERED Letter lost while passing through the Post to the extent of two pounds, in certain cases:

- PROVIDED—1. That the sender duly observed all the conditions of registration required.
2. That the letter was securely enclosed in a reasonably strong envelope.
3. That application was made to the Postmaster for Jamaica immediately the loss was discovered. (When the complaint is that the contents of a letter have been abstracted the envelope must accompany the application, otherwise the question cannot be entertained.)
4. That the Postmaster for Jamaica (whose decision shall be final) is satisfied that the loss occurred while the letter was in the custody of the Jamaica Post Office, and was not caused by any fault on the part of the sender.

JAMAICA CONSTABULARY.

Law 8 of 1867 constitutes an improved Police Force, designated the "Jamaica Constabulary." The new Police is, to a considerable degree, under Military organization, given to it in order to its greater efficiency as a protective force, but it is essentially a Civil Body and those constituting it are bound to discharge the duties which are imposed on Constables, either by the Common or Statute Law. The maximum strength of the Constabulary Force is as follows :—

One Inspector-General.
One Deputy Inspector-General.
Five First Class Inspectors.
Five Second Class Inspectors.
Five Third Class Inspectors.
Fifteen Sub-Inspectors.

Fifteen Sergeants-Major, including
One Depot Sergeant-Major.
Thirty-nine Sergeants.
Eighty-three Corporals.
Two hundred First Class Constables.
Six hundred Second Class Constables.

But the Law does not render it obligatory on the Governor to raise the whole Force, or continue it at the full strength.

The pay of Officers is on the following scale :—

Inspector-General £800 per annum, including £300 as Inspector General of Prisons and Reformatories, and an allowance of 17s. 6d. per diem when actually travelling on inspection, &c.

Deputy Inspector-General £300 per annum, with forage allowance for two horses at 2s. 3d. each per diem and one servant's allowance at 1s. 6d. per diem.

Each First Class Inspector £300 per annum with forage allowance for two horses at 2s. 3d. each per diem, and one servant's allowance at 1s. 6d. per diem.

Each Second Class Inspector £250 per annum with forage allowance and servant, as in the case of a First Class Inspector.

Each Third Class Inspector £200 per annum with forage allowance and servant as above

Each Sub-Inspector £130 per annum with forage allowance for one horse and servant as above.

Each Sub-Inspector when acting as an Inspector of a District, receives half the salary of a Third Class Inspector and half that of an Officer of his own grade, making a total of £165 per annum, with forage allowance for two horses a 2s. 3d. each per diem and one servant's allowance at 1s. 6d. per diem.

The officers of the Force and Sub-Officers of the rank of Sergeant-Major are provided with quarters or lodging allowance.

The following is the pay of the Sub-Officers and Men :—

European Sergeants-Major £140 per annum, also Depôt Sergeant-Major and the Sergeant-Major for Kingston.

Other Sergeants-Major, 4s. 6d. per day
Sergeants, 3s. 6d. per day.

Corporals, 3s. per day.

First Class Constables, 2s. 8d. per day.

Second Class Constables, 2s. 4d. per day.

Second Class Constables, whilst under training at the Depôt receive only 2s. per day.

Water Police Sergeant, 3s. 6d. per day.

Water Police Corporals, 3s. per day.

Water Policemen, 2s. 6d. per day, and 2d. a day additional to each mounted man, whether of the First or Second Class.

No man is admitted into the Force except he produces a certificate from a Magistrate, a Clergyman, or other gentleman of position, testifying to his being of good character for honesty, sobriety, fidelity and activity, and that his companions are reputable and above suspicion.

No person is eligible to be a member of the Force who is not capable of reading, without hesitation, any printed or written document, and of writing a fair hand. Candidates must also be of sound constitution, able-bodied, not below twenty years or above twenty-five years of age, and not less than five feet eight inches in height, and thirty-three inches around the chest.

The period of enlistment is five years, the first three months thereof being probationary. At the end of the five years, the Constable has the option of re-enrolment for a further term of five years, which entitles him to participate in the "Pension Fund," towards which each member of the Force contributes eightpence in the pound of his pay.

Prior to December, 1883, each Constable re-enlisting after his first five years' service received a penny extra per diem from the Constabulary Reward Fund. The rules granting this allowance have been cancelled from the 1st December, 1883, reserving, however, the rights to those Sub-Officers who were already in receipt of the extra penny per diem.

From the 1st January, 1889, this regulation has been entirely abolished, and a system of Good Conduct Badges (similar to that existing in the Army) introduced. Under the new regulation the holder of a Good Conduct Badge is entitled to a penny a day in addition to his ordinary pay.

No man of a higher rank than a Constable will be qualified for this distinction.

Fourpence per diem is stopped from each man for his subsistence while in Hospital, except his sickness has been brought about by his own indiscretion, in which case one shilling and sixpence per diem is stopped.

Each Sub-Officer and man receives annually from the Government one suit of clothes and a pair of boots, and is also allowed bed and bedding free.

No Constable is permitted to marry until he has completed four years' service.

Return shewing the Strength of the Constabulary on the 31st March, 1908.

KINGSTON—						In many instances the average attendance appears very low, because the calculation is based upon every Sunday's attendance. Most of the ministers have two or more churches under their charge, consequently in the Minister's absence services are conducted by lay helpers frequently, and on these Sundays the congregation are usually much smaller than when the Minister is present. In some cases, the average attendance is approximate only. In addition to the accommodation reported here there is accommodation for over 4,000 persons in out-stations not included in this list. The reductions and blank spaces shown in the "accommodation" column are due almost entirely to the hurricane of 11th August, 1903.

REMARKS ON SQUATTING.

Squatting is not so prevalent on the Government Lands, owing to the more constant and effective supervision they have been receiving during recent years, as well as to the proceedings which are continually being taken for the forfeiture of lands for non-payment of quit-rents, and to the facilities now afforded by the Government to small settlers for the purchase of lands on easy terms.

A property, containing 300 acres, was recovered from 55 squatters during the year, 1907-1908.

What is the source of the Water Supply; the quality of the water; and the amount of water available for each patient every day?

The Hope River, Government Water Works. By analysis, variable. The amount of water available per head is practically unlimited.

What is the number of—(I.) Lavatories

Every ward is provided with a lavatory. Day is begun by a general bathing. In a special case, and for sick and helpless, hand basins and zinc baths are provided.

(II.) Baths?

Fresh water shower baths, are provided in all the wards. The sea bath (destroyed by hurricane of 11th August, 1903) is now being replaced by the Public Works Department.

(III.) Latrines?

Self-flushing water closets connected to the Kingston system of sewerage have been installed in the place of the earth-bucket latrines.

What is the system of Sewerage?

Hard to define. Open gutters and a short length of sewer carry foul and storm waters into harbour. The sewer is flushed by automatic syphons. Garbage burnt.

(II.) And other grounds	109	0	0	

Are the patients, as a rule, given daily exercise, their health permitting? Yes; they live in the open air, are given walks on the grounds.

Are they confined to airing courts, or allowed to walk in other grounds, and sent beyond the asylum? Allowed exercise in the Asylum grounds beyond the Airing Courts as much as possible.

Agriculture and Gardening are affected by tropical rains, or hot weather, when such employment becomes to some extent impracticable.

1 There are two outside baths on the male side and two on the female side, all supplied from iron tanks connected with the water pipes. There is one terraced bath for females attached to the Victoria ward. The outside baths discharge into a main drain through trapped pipes connected with each bath.

2 In the main building there are two enamelled baths. 2 WC's., 2 wash-hand basins, and sinks. These are all connected by trap drains with the Kingston Sewage System.

In the outbuildings there are two terrace baths, two washhand basins, 4 WC's, and sinks from kitchen, pantry and laundry, all connected by trap drains with Kingston Sewage System.

In the isolation house there is one washhand basin connected with Kingston Sewage System by a trapped drain.

3 Good concrete baths.

4 There is no separate bath-room since the hurricane.

QUESTION, II., *cont. med.*

(II.) Detail the arrangements as to bath and lavatories.

- 5 There are two lavatories, one for each class of patients; they are each furnished with shower baths and have concrete flooring.
- 6 Large concrete bath in bath-room, water supplied by a tap.
- 7 There is a new bath-room recently built. Convalescents when able go to the sea near by.
- 8 Male and female baths and lavatories. Pipes and drains to carry off overflow.
- 9 Bath-room and a lavatory for males and one for females.
- 10 Basins are used in the wards. A bath is also placed in separate room.

- 13 Patients bathe in the sea and also in bath-pans in one of the rooms under the hospital building.
- 14 There are two bath houses with concrete baths for the use of the male and female patients.
- 15 Bath-room with cement bath supplied by water from pipe into a cement bath. A zinc bath, also sea baths.

QUESTION III.

(II.) Detail the arrangements as to 19 There are two terraced baths, one for baths and lavatories. males and one for females.

- 20 7 baths, 1 lavatory, male side.
 1 " 1 " " hospital.
 2 " 1 " " female side.
 1 " 1 " " hospital.

(III.) What is the system of sewerage and what the condition of the privies?

1 Water carriage system by trapped and ventilated drains connected with the Kingston Sewage System.

2 Water carriage system by trapped and ventilated drains throughout.

3 Dry earth system.
Privies have wooden floors.

4 Dry earth system.

5 There are several short surface drains, and a 5 inch earthenware pipe leading from the four water closets to the sea. The water carriage system is in use as regards the privies for the patients and the dry earth for the members of the staff. Automatic flushing system is in use in the patients water closets.

6 Privies on dry earth system.

7 There is no regular system of sewerage. Storm water disappears rapidly in consequence of the porous nature of the soil. All refuse matter is taken to the sea near by and thrown away. The bucket system is in use. The buckets are emptied daily or oftener if necessary. A new latrine system has been built this year. It consists of the bucket system, having 10 seats for males and 5 for females. A trough of water supplied by a tank runs about 18 inches above the seats, so that the coolies may have water to wash with. The seats are made of concrete, and are divided from one another by iron rails for the coolies to hold on to when standing on the concrete seats. The floors are made of concrete.

QUESTION III, *continued.*

(III.) What the system of sewerage, and what the condition of the privies?

- 8 Dry earth buckets emptied into the sea morning and evening.
Privies in order.
- 9 Dry earth system. Excreta removed nightly. Buckets in the male and female wards.

- 12 Privies built over and emptying into the sea.
- 13 All refuse, &c., emptied into the sea. Privies clean overhanging sea on cliff.
- 14 Open drains concreted. Privies in good condition with concreted floors. Bucket and dry earth system.
- 15 Privies overhanging the sea.
- 16 Open surface drains. The privies are on the dry earth system, and in good order, having concreted floors.
- 17 The wards of the old building are supplied with latrines in the wards, one for each, and are placed in one corner with a supply of dry earth. A new latrine with concrete floor has been built off the old Constabulary Ward.

Attached to the new buildings are two latrines arranged for a bucket. Dry earth is used in these as well.
Concrete drains.
- 18 Cement surface drains round wards and outbuildings. Dry earth system. Excreta now emptied about half a mile away from the Hospital.
- 19 Covered drains from urinals and sink near kitchen opening into drain sewer of the town.
- 20 The surface water as well as that from the baths, lavatories, urinals, kitchen and wash house, is carried off by open surface drains which discharge their contents into an open drain which empties into a gully near by. The earth system has been in operation for years here, and has given entire satisfaction.
